SISTEMA DE BATENTE COM RUTURA DE PONTE TÉRMICA

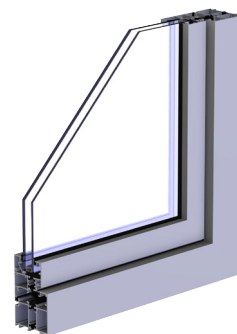

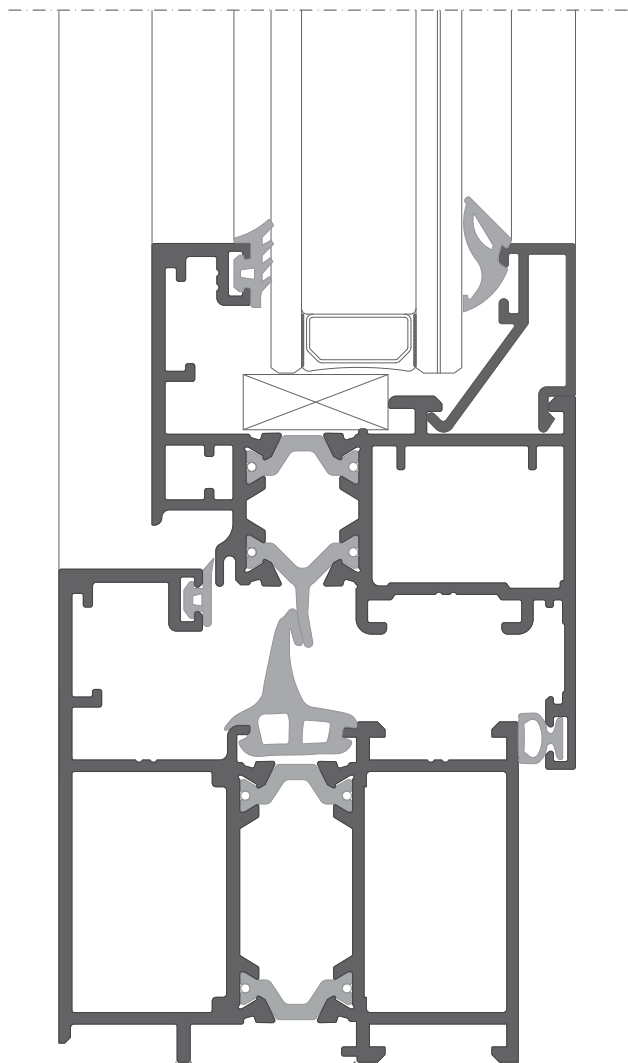

CASEMENT SYSTEM WITH THERMAL BREAK

O SISTEMA N14 600 TEM PELO SEU DESENHO AS CARACTERÍSTICAS IDEAIS PARA UTILIZAÇÃO EM PROJETOS DE REABILITAÇÃO

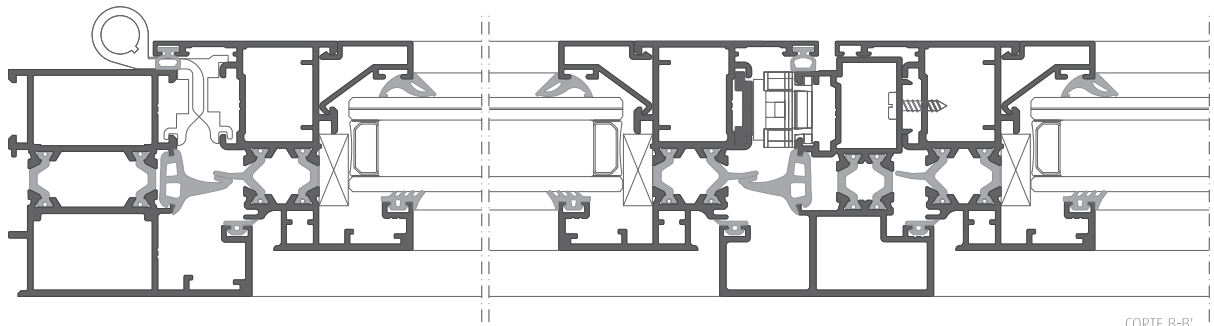

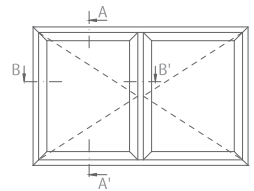

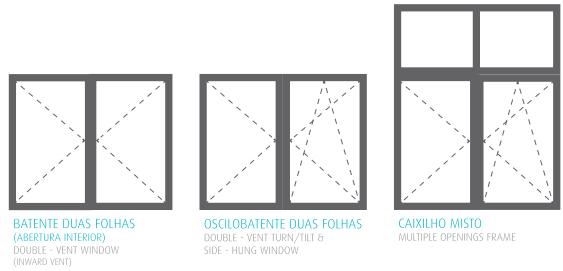

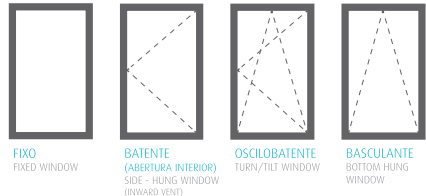

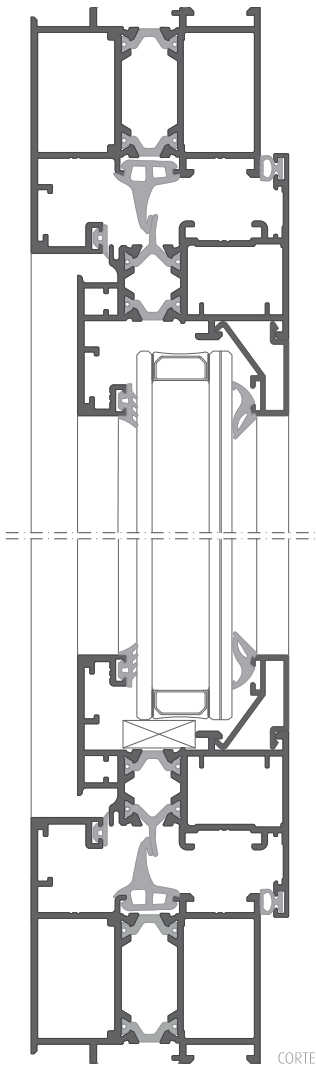

THE DESIGN OF THE N14 600 SYSTEM GIVES IT THE IDEAL FEATURES FOR THE USE IN REHABILITATION

Resulta num sistema com boas performances térmica e acústica, possibilitando também a sua aplicação em projetos de arquitetura contemporâneos. Com aro fixo de 67,4mm e utilizando acessórios de câmara europeia, este sistema permite a aplicação de uma vasta gama de bites para múltiplas soluções de vidro duplo. Permite ainda diferentes possibilidades de acabamentos, incluindo bicolor e efeito madeira. O seu desenho em alçado caracteriza-se por um interior de folha coplanar com o aro fixo e no exterior a folha e o aro fixo trabalham em diferentes planos. Sistema desenvolvido tendo em conta a temática ecológica, desde o processo de produção à utilização de materiais.

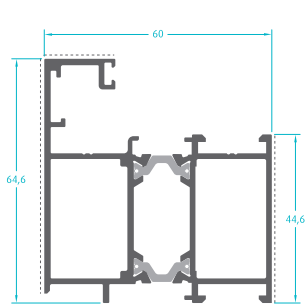

This system has a good thermic and acoustic performance, enabling its application in contemporary architectural projects. With fixed frame of 67,4mm and working with European chamber accessories, this system allows the application of a wide range of bits for multiple glazing solutions of double glass. The system also allows different possibilities of surface finishing, including bicolour and wood effects. Its elevation drawing is characterized by an inner coplanar sheet with the outer fixed frame. In the exterior the pane and the fixed frame work at different plans. This system was developed taking into account ecological issues, from the production process to the use of materials.
