CENTRAL MINIMALISTA 35

SISTEMA DE CORRER COM RUTURA DE PONTE TÉRMICA

SLIDING SYSTEM WITH THERMAL BREAK

ARQUITETURA: Arq. MÁRIO SANTOS FOTOGRAFIA: JOÃO MORGADO-FOTOGRAFIA DE ARQUITECTURA

Permite a realização de janelas de peitoril e de sacada termicamente melhoradas, tendo uma boa resposta às exigências atuais da construção, tais como, isolamento térmico, economia de energia, resistência mecânica, durabilidade e segurança na utilização.

Sistema de correr em alumínio com poliamidas de 28 e 34 mm, reforçadas com fibra de vidro para fazer o corte térmico, aros fixos perimetrais de diversas configurações, com opção em tri-rail e quadri-rail e aros móveis com cortes retos e possibilidade de vista central minimalista de 35mm.

Sistema de vedação utiliza pelúcias com lâmina central, o que melhora a estanquidade à água e a permeabilidade ao ar. Possibilita a realização de vãos bicolor (interior/exterior).

Vidro: até 28mm

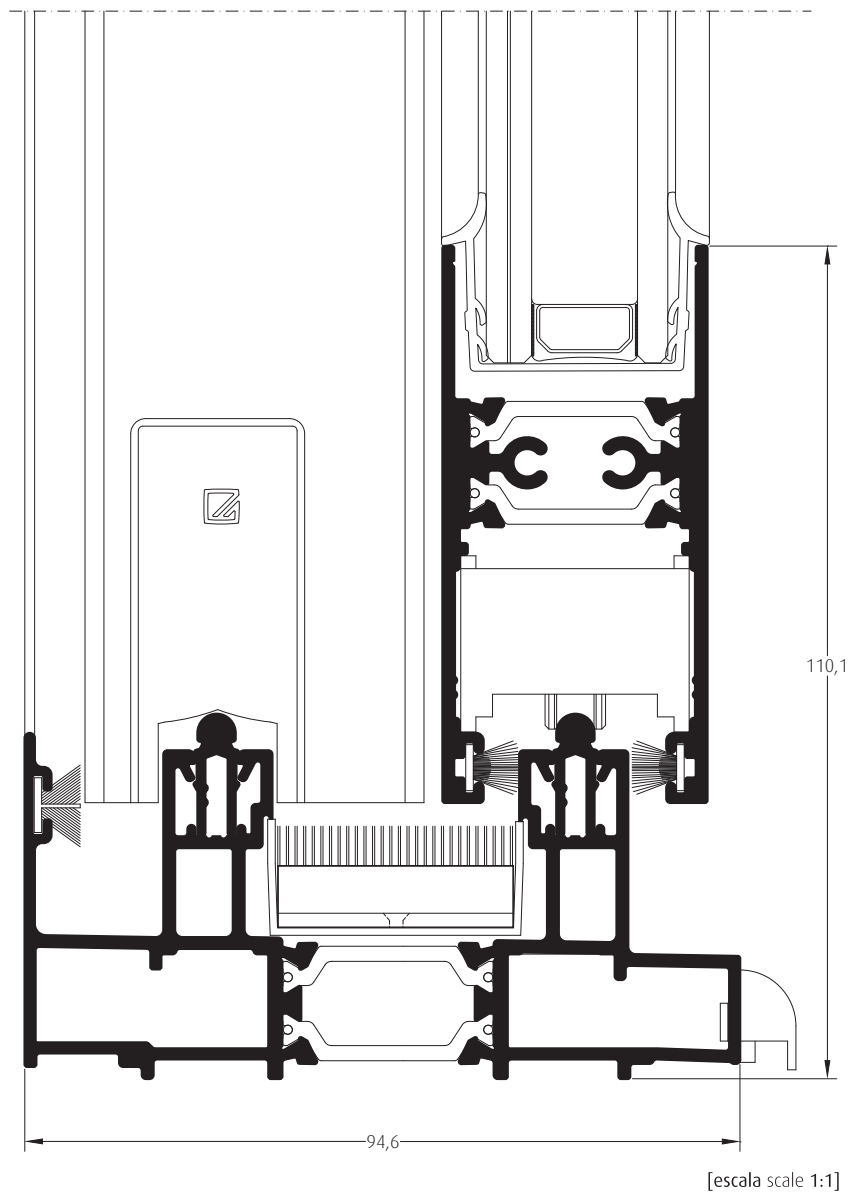

Enables the assembly of thermally improved sill and balcony windows, satisfying the essential construction requirements, such as thermal insulation, energy saving, mechanical resistance, durability and safety.

Aluminium sliding system with polyamides of 28 and 34mm, reinforced with fiberglass to make the thermal break, perimeter fixed frames of different configurations, with option in tri-rail and quadri-rail and vent frames with straight cuts and possibility of a 35 mm minimalist central view.

Sealing system utilises brush gaskets with a central fin, improving water tightness and air permeability. Available in bicolour finishings (interior/exterior).

Glass: up until 28mm
